

# CONTINUOUS FURNACE ROLLER HEARTH

## Roller Hearth Type Continuous High-temperature Carburizing and Quenching Furnace

Use of large-capacity regeneration gas burners and a large-airflow diffusing fan provides the ability to create a uniform, rapid temperature rise and minimized temperature distribution. This shortens the carburizing time, which significantly reduces treatment costs.

# Roller Hearth Type Continuous High-temperature Carburizing and Quenching Furnace

## FEATURES

- Shortens the lead time to reduce treatment costs.
- Facilitates high carbon concentration carburizing.
- Assures quality that is equal or superior to that provided by conventional carburizing methods.

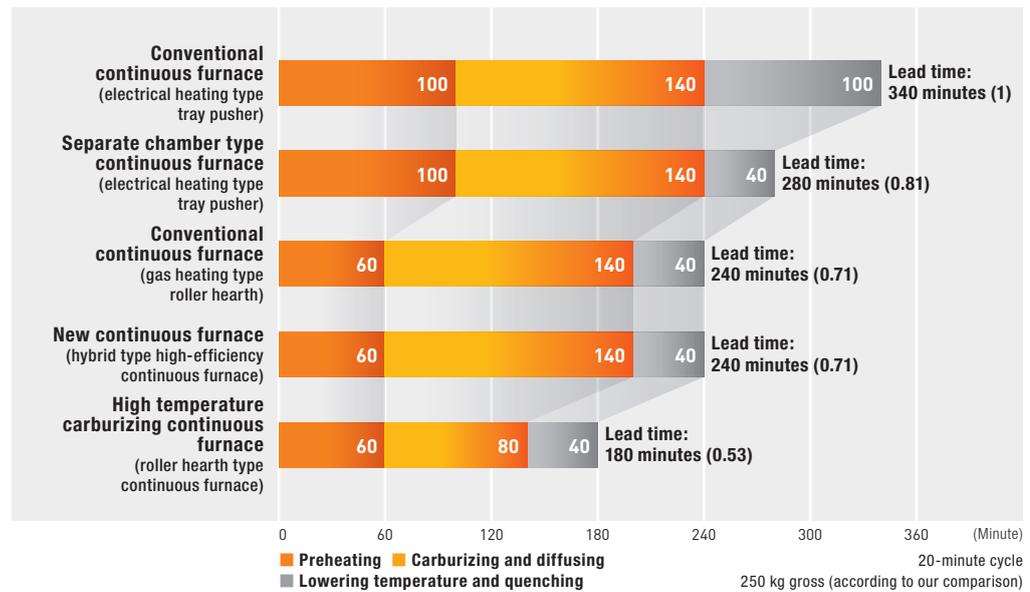

## BENEFITS

\*Compared to our earlier batch furnaces

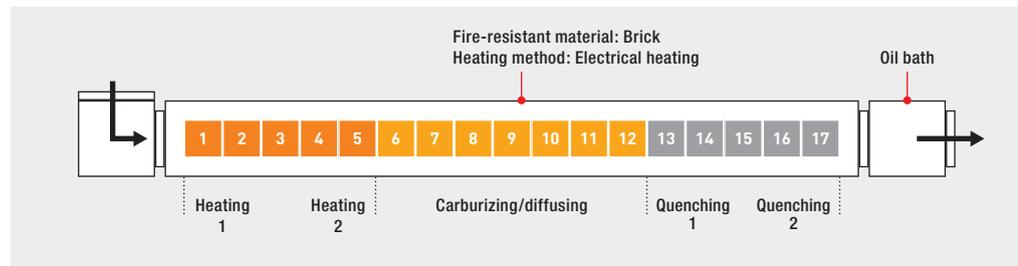

### Significantly shortened lead time

Use of large-capacity regeneration gas burners and a large-airflow diffusing fan provides the ability to create a uniform, rapid temperature rise and minimized temperature distribution. This shortens the carburizing time, which significantly reduces treatment costs.

Track record of shortening the lead time of continuous furnaces
